RE: Material Safety Data Sheets (MSDS)

Material Safety Data Sheets contain safety information for dealing with hazardous substances.

In accordance with the Occupational Safety and Health Administration (OSHA) Hazard Communication Standard 29 CFR 1910.1200, we do not prepare MSDS for finished products such as pencils, markers, highlighters, fibre-tip pens, fineliners, gel liners, ballpoint pens, erasers or chalks as they do not represent hazardous materials or preparations as defined by the Hazard Communication Standard.

Our chemical product data sheets, however, contain all necessary data relating to components for example of inks or leads, plastic used for housing as well as conformity with relevant standards.

In case of further questions regarding our products, please contact:

Customer Service: Address above
